introduction:

Our AI study helper is a cutting-edge platform designed to revolutionize the way students learn and study. It offers personalized study materials and guidance tailored to each student's unique learning style and needs. Our study helper analyzes how students learn and what they need help with to create customized study plans, slides, and quizzes. Students can also upload and organize their own study materials, including slides, audio, video, and documents, making it a comprehensive tool for all their studying needs.

One of the key features of our study helper is its ability to generate summaries and mind maps using smart technology, helping students grasp complex concepts and information more effectively. Students can create an account and link it to their Google Drive for easy file upload, and they can access their study materials offline, making it convenient for studying anytime, anywhere. With search and organization features, our AI study helper provides students with a complete and efficient platform for their studying needs.

1-what is the general project idea ?

Create an AI study helper that uses smart technology to provide personalized study materials and guidance to students. The helper will analyze how students learn, what they like, and what they need help with to make customized study plans, slides, and quizzes. Students can also upload and organize their own study materials like slides, audio, video, and documents. The helper can even generate summaries and mind maps using smart technology. Students can create an account and link it to their Google Drive for easy file upload. They can access their study materials offline too. With search and organization features, our AI study helper gives students a complete and efficient platform for their studying needs.

2-who are the targeted users?

The target users for this project are students from various educational levels seeking effective tools and resources to support their learning journey.

3-what are the main problems we are trying to solve?

- Limited Study Time: Often, students find themselves facing a multitude of subjects to study within a short period. In such cases, our app will assist them by prioritizing the most important topics, ensuring they can make the most efficient use of their available study time.
- Lack of Self-Assessment: The assistant includes interactive quizzes to assess students' comprehension, identify knowledge gaps, and reinforce learning, providing immediate feedback and promoting active learning.
- Fragmented Study Resources: The assistant consolidates various features into a single application, offering personalized study plans, visually engaging slide presentations, interactive quizzes, and performance analytics in one unified platform, eliminating the need to navigate through multiple disjointed tools.
- Limited Collaboration: The assistant facilitates collaboration and sharing, allowing students to collaborate with peers, share study materials, and engage in peer learning.

4-how are you going to collect the data from the users?

We will collect data through interviews, surveys, and thorough research to gather valuable insights.

5-how are you going to find users?

university and school student

6-what interview questions are you going to ask?

- 1.What are the biggest challenges you face when it comes to studying? How do these challenges impact your learning experience?
- 2.In your opinion, what role does technology play in supporting effective studying?
- 3.Can you describe a situation where you felt overwhelmed by the amount of information you needed to study? How did you handle it, and what improvements would you have liked to have at that time?
- 4.Have you used interactive quizzes to study before? If yes, how helpful were they?
- 5.How important is it for you to have access to study materials on your mobile devices?
- 6.-As a student, what challenges do you currently face when it comes to summarizing clips or slides for your studies?
- 7.-Can you share your overall impression of the website's concept and its potential impact on students' lives?
- 8.-Which of the following features do you find most appealing for a student-focused website: a) Clip and slide summarization, b) Question generation, c) Organizational tools, or d) Other (please specify)?
- 9.Do you prefer consolidating all your study sources into a single app for comfort, or would you find it irksome?
- 10.In light of the significant advancements in artificial intelligence, do you believe it will aid in your writing and summarization with precision, or do you worry about potential inaccuracies?
11. Would you rather engage in traditional studying methods involving books and papers, or do you prefer employing advanced technological techniques in today's era? Also, do you believe that utilizing technology can lead to time and effort savings?
- 12.- On a scale of 1-10, how interested are you in using AI-based tools to enhance your learning experience?
- 13.- What learning tools are you comfortable using?
- 14.- How do you ensure that the elearning content is accessible to all learners?
- 15.- Explain how you would use multimedia elements (e.g. audio, video, animation) to enhance an elearning course.
- 16.What types of multimedia elements :(images, videos, audio) do you find most engaging in study materials?

interview with Reem Bahashwan (high school student): **Done by sarah bahashwan**

What are the biggest challenges you face when it comes to studying? How do these challenges impact your learning experience?

managing my time . With so many subjects and assignments to cover, it can be overwhelming to prioritize and allocate enough time to each one. Sometimes, I find it difficult to balance all my responsibilities and end up feeling stressed or rushed.

In your opinion, what role does technology play in supporting effective studying?

In my opinion, technology plays a vital role in supporting effective studying by providing easy access to information, offering tools for organization and productivity, and enabling interactive and engaging learning experiences.

Can you describe a situation where you felt overwhelmed by the amount of information you needed to study? How did you handle it, and what improvements would you have liked to have at that time?

I remember a situation where I felt overwhelmed by the amount of information I needed to study. It was during exam week when I had multiple subjects to prepare for. I had so many notes, textbooks, and online resources to go through, and it felt like I would never finish studying everything in time. To handle it, I tried to break down the information into smaller, manageable chunks and created a study schedule. I also used techniques like summarizing key points and making flashcards to help me review. I wished I had access to better study tools or apps that could have helped me organize and prioritize the information more

interview with Zayn Aqeel (university student):
done by rabia hilal

As a student, what challenges do you currently face when it comes to summarizing clips or slides for your studies?

I don't have much time to summarize all of my subjects

Can you share your overall impression of the website's concept and its potential impact on students' lives?

It can save me so much time and organize my studies

Which of the following features do you find most appealing for a student-focused website: a) Clip and slide summarization, b) Question generation, c) Organizational tools, or d) Other (please specify)?

B-Question generation

Because with questions i can remember faster

interview with Raghad abdulrahman (university student):

done by Deema alsini

Have you used interactive quizzesto study before? If yes, how helpful were they?

It helps with memorizing the informations in useful way, and change the studying routine to be more enjoyable.

What types of multimedia elements :(images, videos, audio) do you find most engaging in study materials?

All of them help in different ways, but me personally I prefer images because it helps me to imagine the topic

How important is it for you to have access to study materials on your mobile devices?

Extremely important, due to the different situations I might be in and need to access to my study materials

On a scale of 1-10, how interested are you in using AI-based tools to enhance your learning experience?

8 , I'm really interested to use this tool to change my learning experience.

interview with Labebaih Mufti (University student): **Done by Munira Mufti**

Do you prefer consolidating all your study sources into a single app for comfort, or would you find it irksome?

Certainly! Absolutely anyone would be wise to accept such an offer, as it's preferable than being ensnared in numerous applications.

In light of the significant advancements in artificial intelligence, do you believe it will aid in your writing and summarization with precision, or do you worry about potential inaccuracies?

yes, there is a slight possibility of worry at the beginning, yet true accuracy often relies on firsthand experience as the most reliable evidence.

Would you rather engage in traditional studying methods involving books and papers, or do you prefer employing advanced technological techniques in today's era? Also, do you believe that utilizing technology can lead to time and effort savings?

Throughout my academic journey, technology played a minimal role, as I relied predominantly on books and personal summaries, a method I cherished for my passion for traditional writing and reading. However, upon entering college, the convenience of using a tablet with all necessary books outweighed the burden of carrying physical copies. Gradually, I transitioned to utilizing various programs to streamline information organization, adapting to a more tech-oriented approach to studying.

interview with Rana AL Qahtani (middle school student):
done by Jood Faris.

What learning tools are you comfortable using?

I like using chatGBT as it makes learning and studying more easy and more understandable .

In your opinion, How do you ensure that the learning content is accessible to all learners?

I think that Using simple easy-to-understand language, short and clear sentences for the learners makes them understand the material very well .also, Linking your content in a logical and consistent way and Provide visual alternatives to text content to meet different learning needs like pictures or videos might help.

Explain how you would use multimedia elements (e.g. audio, video, animation) to enhance an learning course.

I think multimedia elements are very useful for enhancing e-learning courses, as they can appeal to different learning styles, increase engagement, and clarify complex concepts. However, I also believe that multimedia elements should be used strategically and appropriately, depending on the learning objectives, audience, and context.

I use Audio to provide narration, feedback, instructions, or background music. I would use video to demonstrate a process, show a real-life scenario, or illustrate a concept. and use animation to create motion graphics, simulations, or games.

5 needs:

- Need for efficient summarization of clips and slides.
- Need for generating meaningful questions from educational content.
- Need for effective organization and management of study materials.
- Need for improved comprehension and understanding of the content.
- Need for a user-friendly platform that enhances the student's learning experience.

5 insights :

- Students often struggle with time-consuming summarization of lengthy clips or slides.
- Generating questions from the content helps reinforce learning and critical thinking.
- Organized study materials lead to better productivity and reduced stress.
- Interactive learning methods, such as question creation, enhance knowledge retention.
- A user-friendly and intuitive platform increases user engagement and satisfaction

Based on these needs and insights, here are five tasks that your website can perform to meet user needs

the tasks:

- Clip and Slide Summarization: Develop a feature that enables students to efficiently summarize clips or slides, extracting key points and essential information.
- Question Generation: Implement a tool that allows students to create relevant and thought-provoking questions based on the content, promoting active learning and deeper understanding.
- Study Material Organization: Provide a comprehensive organizational system where students can categorize, tag, and easily access their study materials, ensuring a streamlined and clutter-free study environment.
- Comprehension Enhancement: Incorporate interactive elements, such as quizzes or flashcards, to reinforce learning and help students grasp the content more effectively.
- User-Friendly Interface: Design an intuitive and visually appealing user interface that offers a seamless user experience, making it easy for students to navigate, interact with features, and stay engaged with the platform

explaining the new design

The new design of the AI study helper “Gotcha” will transform how students approach their learning journey. By harnessing smart technology, the system will gather insights into each student's learning style, preferences, and areas of difficulty. The platform screen of the AI study helper presents a user-friendly interface designed with the familiarity of social networking programs in mind. Here, users can access their personal profiles and private information, conveniently placed in a clear corner for easy navigation. This layout facilitates seamless interaction, allowing users to swiftly find and refer to everything they need for their study sessions.

The calendar screen offers a visual representation of the user's study schedule, integrating with personalized study plans generated by the system. Users can view important dates, deadlines, and study sessions, helping them stay organized and manage their time effectively. This feature enables users to prioritize tasks and allocate dedicated study time for different subjects or topics.

On the quizzes screen, users can engage in interactive assessments that test their understanding and knowledge retention. The quizzes are designed with a variety of question types to provide a comprehensive evaluation of the user's comprehension. Features like a test timer add an element of challenge and mimic real exam conditions, aiding users in preparing effectively for their tests and exams.

explaining the new design

Beyond the platform, calendar, and quizzes screens, the AI study helper offers a range of features to enhance the learning experience. These include:

- The system analyzes user data to create customized study plans that prioritize important topics based on the user's learning style and areas of difficulty.
- Users can access a vast repository of study materials, including slides, summaries, and mind maps, all organized within the application for easy reference.
- The application fosters collaboration among users, allowing them to share study resources, engage in peer learning, and collaborate on projects or assignments.
- Users can access their study materials offline, making learning accessible anytime, anywhere. Integration with Google Drive simplifies file management and ensures seamless synchronization of study materials across devices.
- The application provides performance analytics and progress tracking, offering insights into user performance, areas of improvement, and learning progress over time.
- Designed to cater to students across different educational levels, the application adapts its features and content to suit the needs of elementary, middle, high school, and college students.

figma designs

this is the "loading" interface which comes when you first open the app

if you press they log in button "log in" interface is going to appear

in the "log in" interface the user will enter his username and password also he could use his google, facebook and x to enter to his account.

this is the sign up interface in this interface the user can create their own account adding their name their e-mail the password and they should confirm it and then create it

if the user doesn't have account he can sign in by pressing the button sign up

figma designs

after logging in\signing up to your account the "home page" enter your face is going to show up welcoming you

in the home page you're going to find categories you can choose from ai, platform, my files and calendar

this is the taskbar that has notifications button ,comments , home page , likes and my account in this order

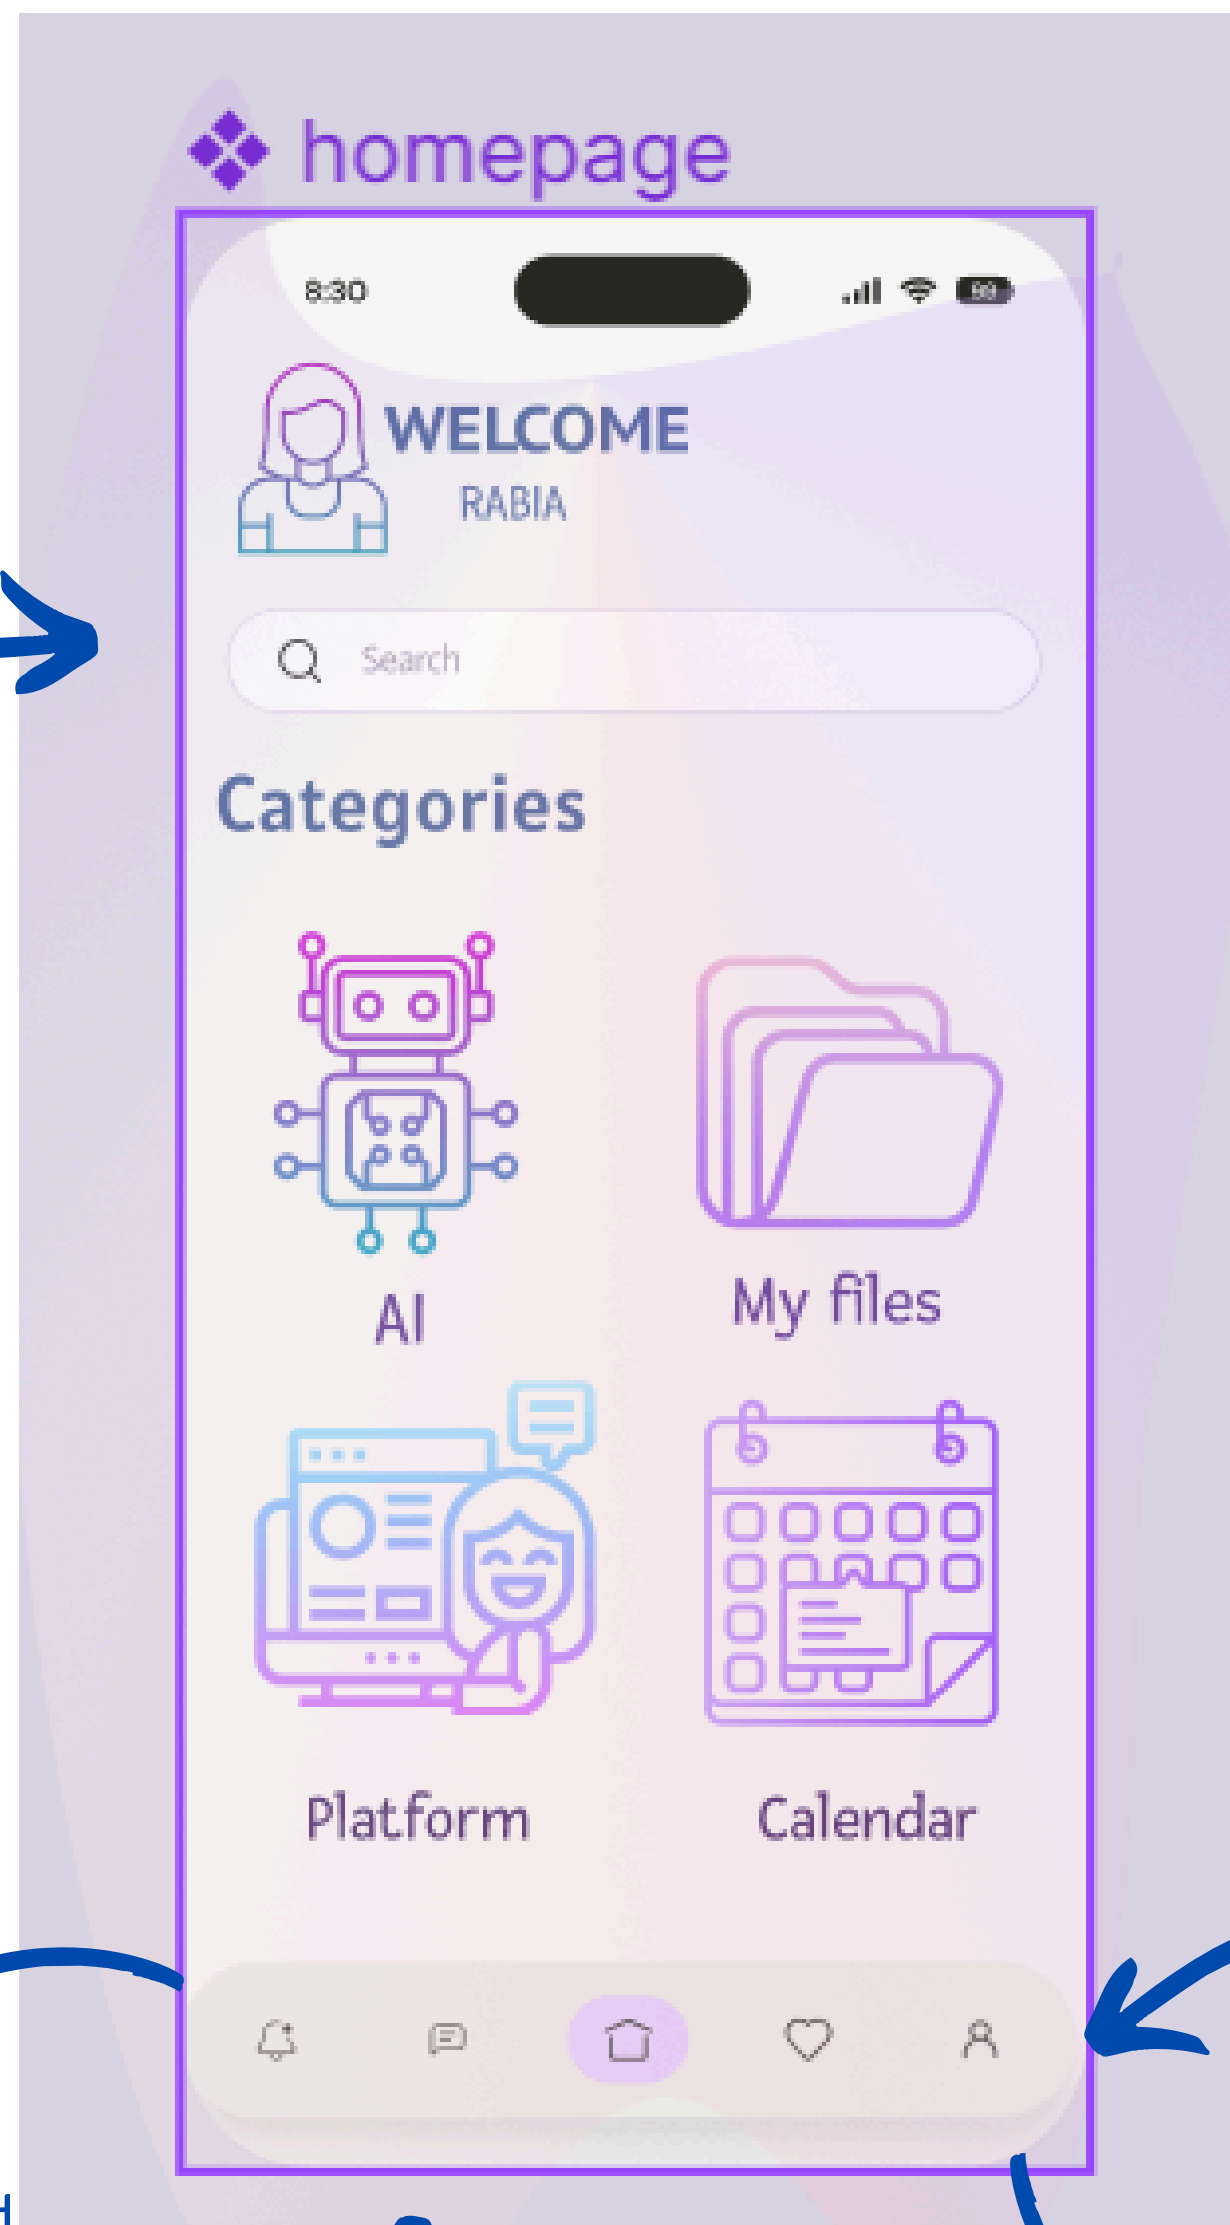

in the notification you can find notification from your platform or due a task is coming near in your calender.

this is the direct massager you can text anyone you follow

home page button to return to it when ever you need

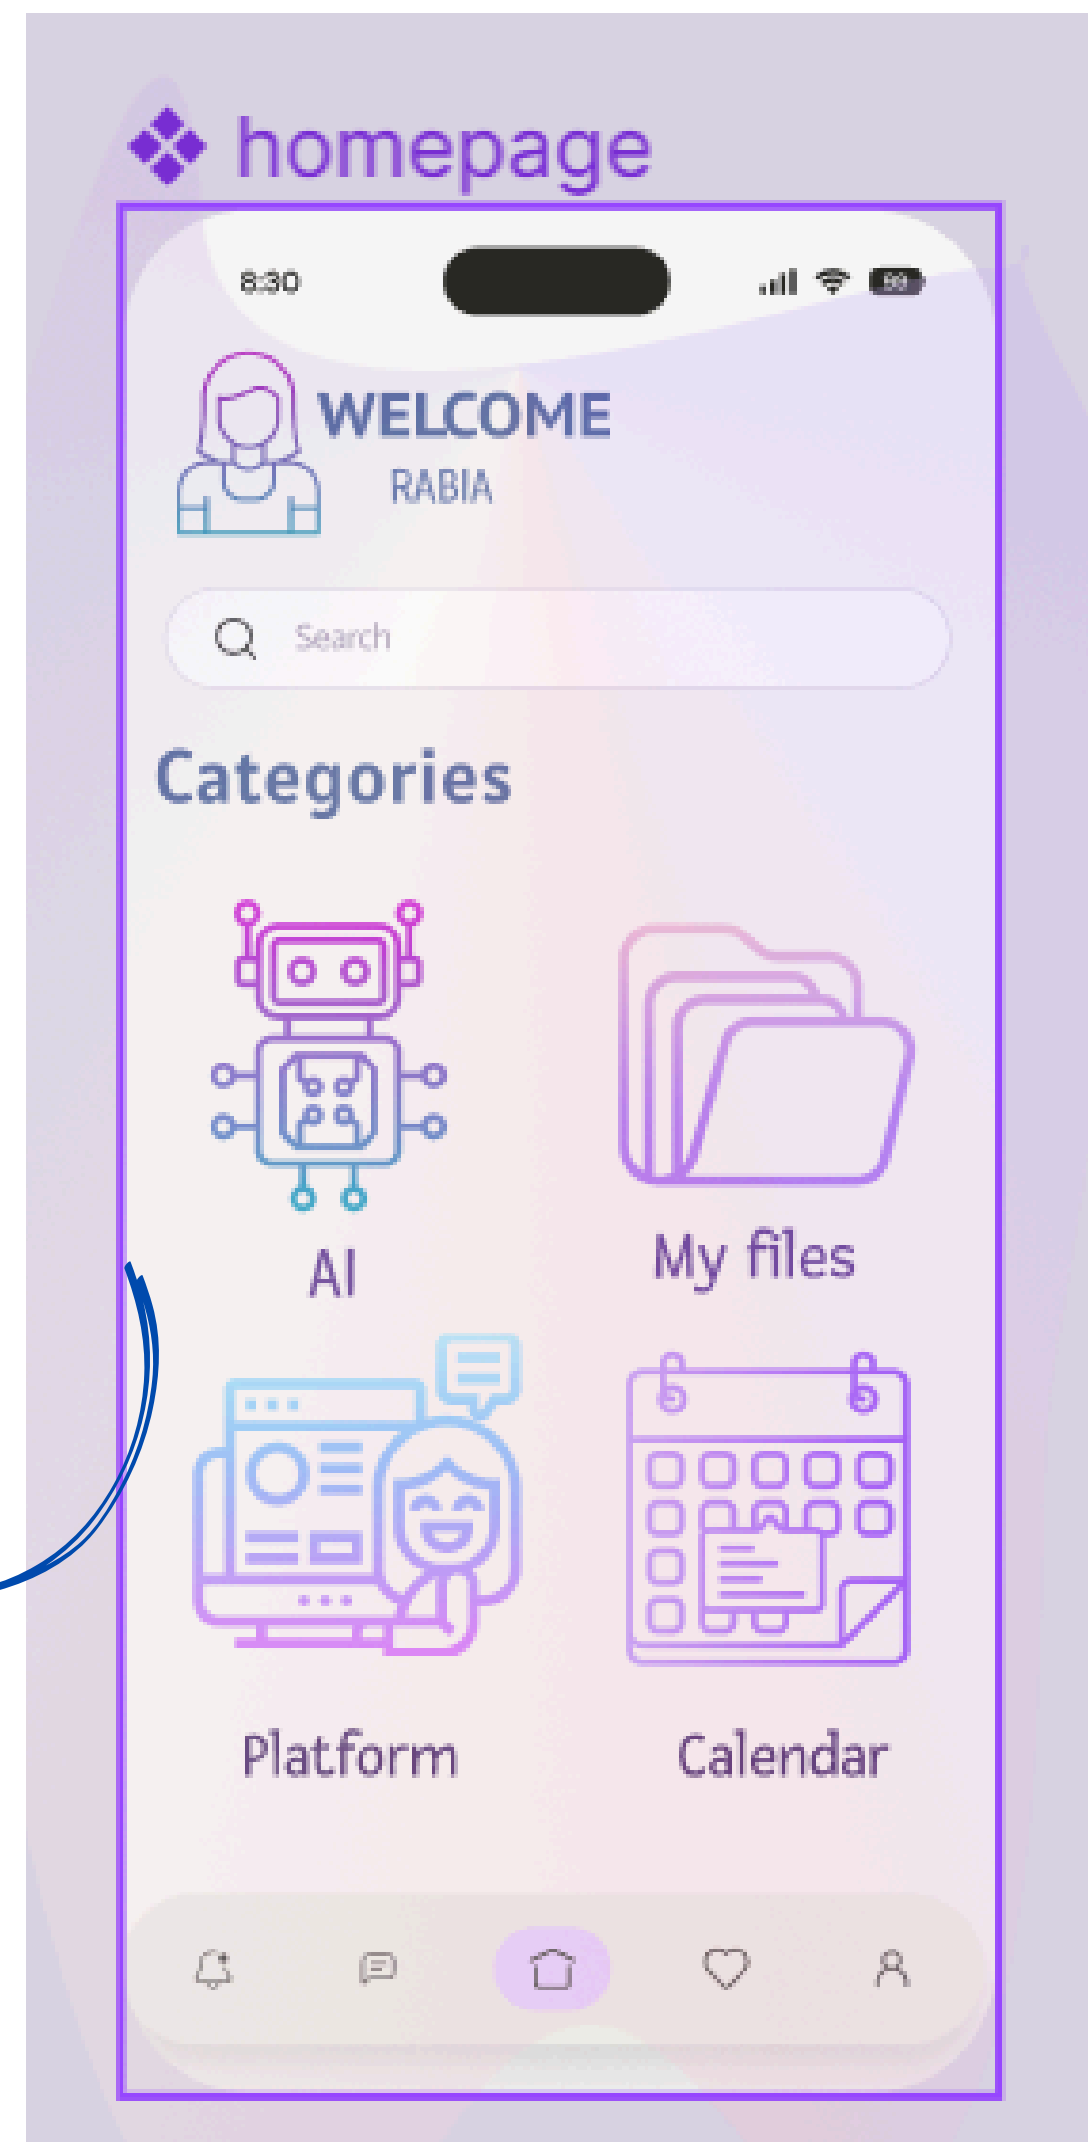

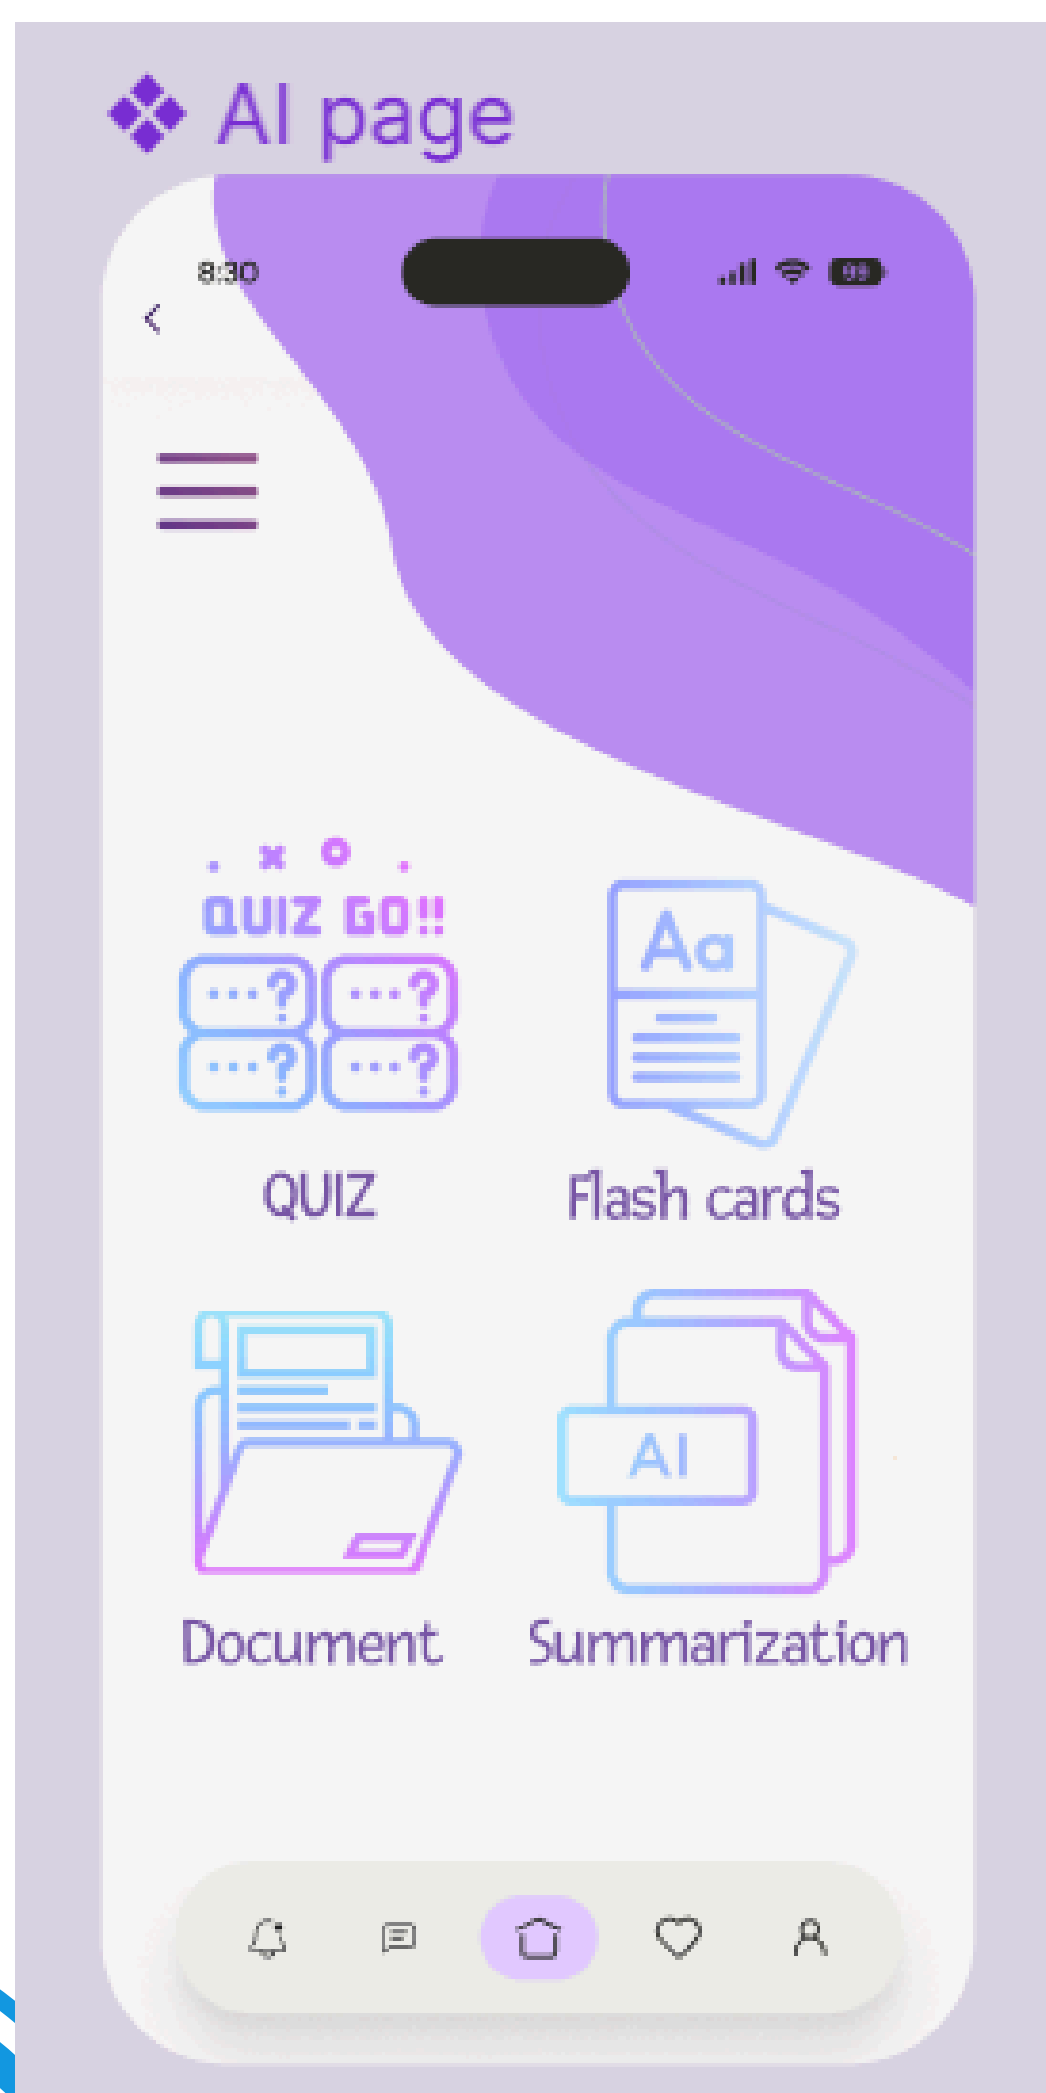

here you can see the things you liked before

this is the myaccount button here you access to it .

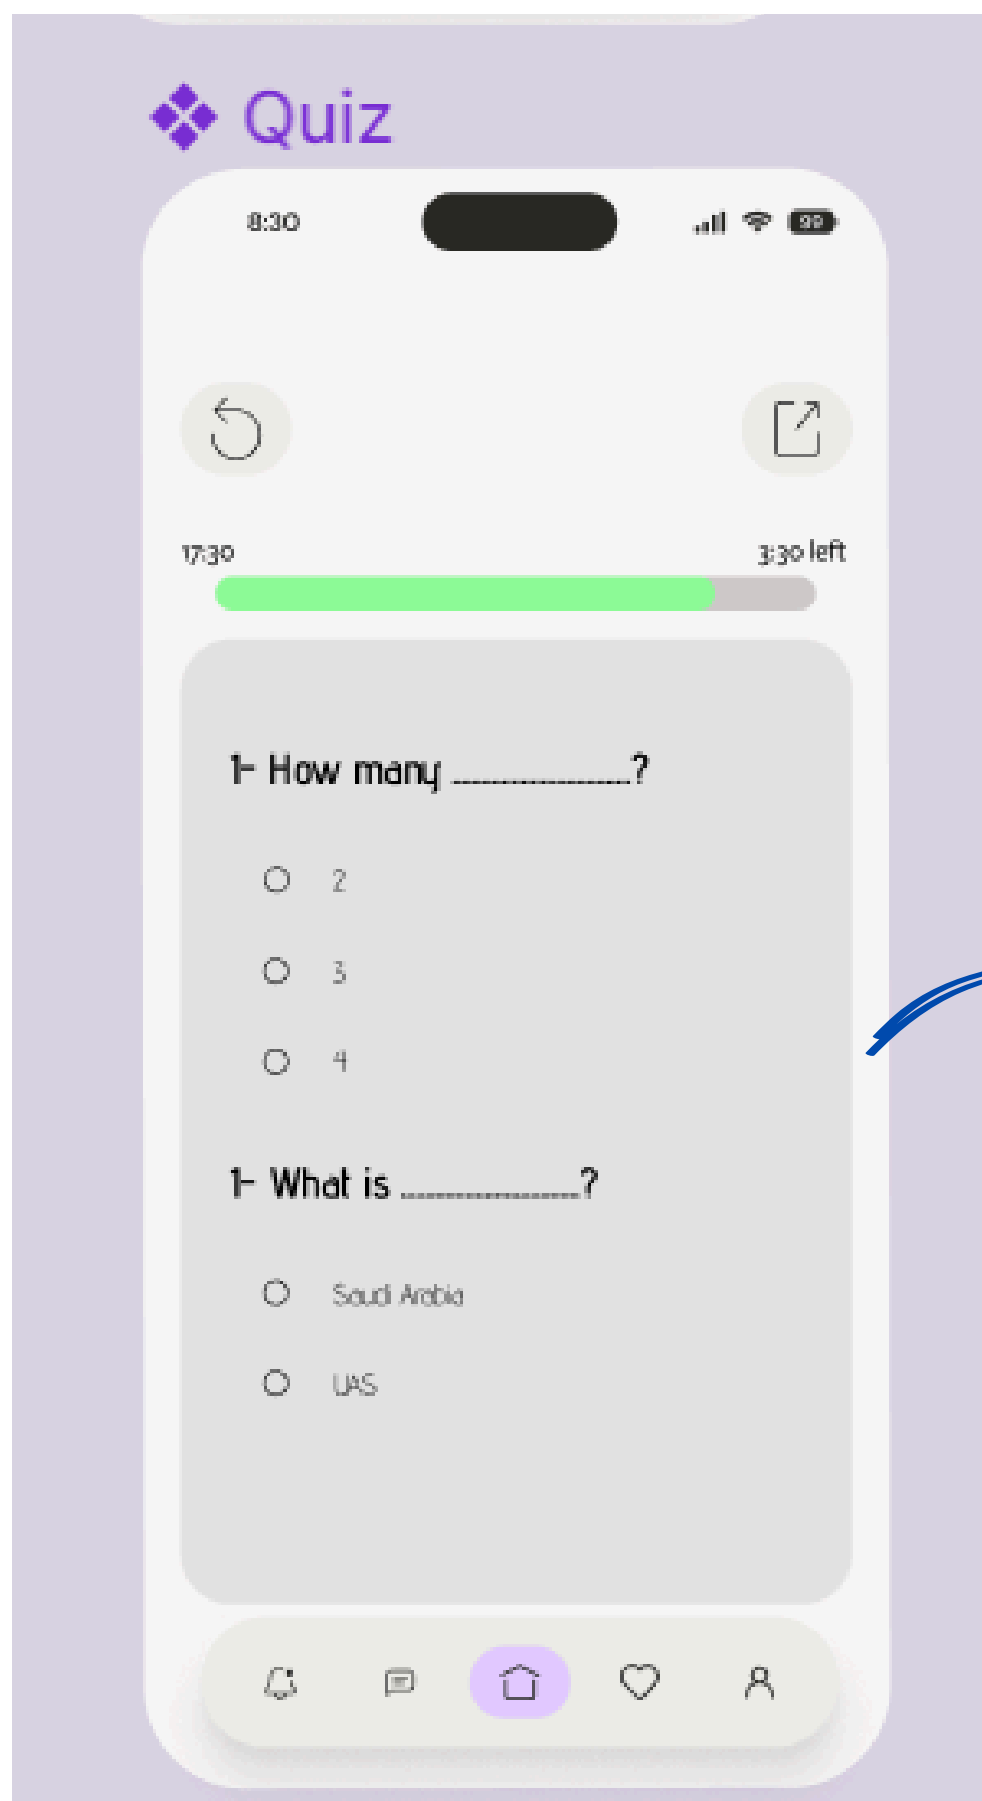

figma designs

in ai page you can choose if you want generate a quiz , flash cards , change the document format or summarize you uploaded document

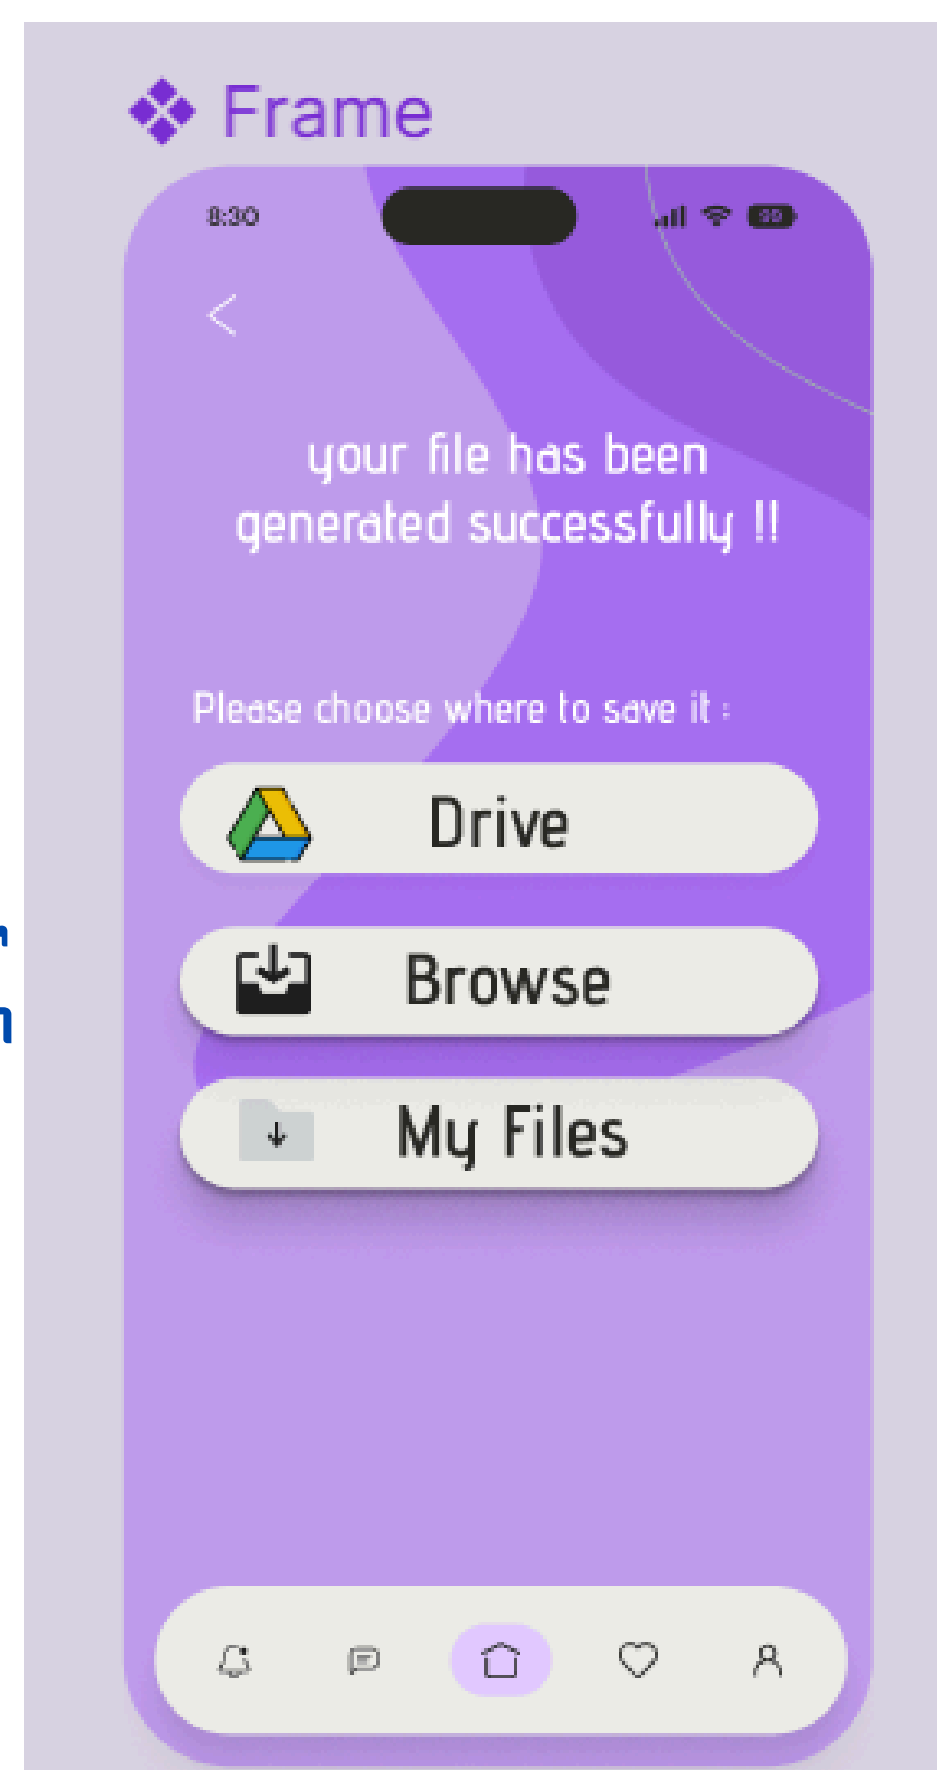

figma designs

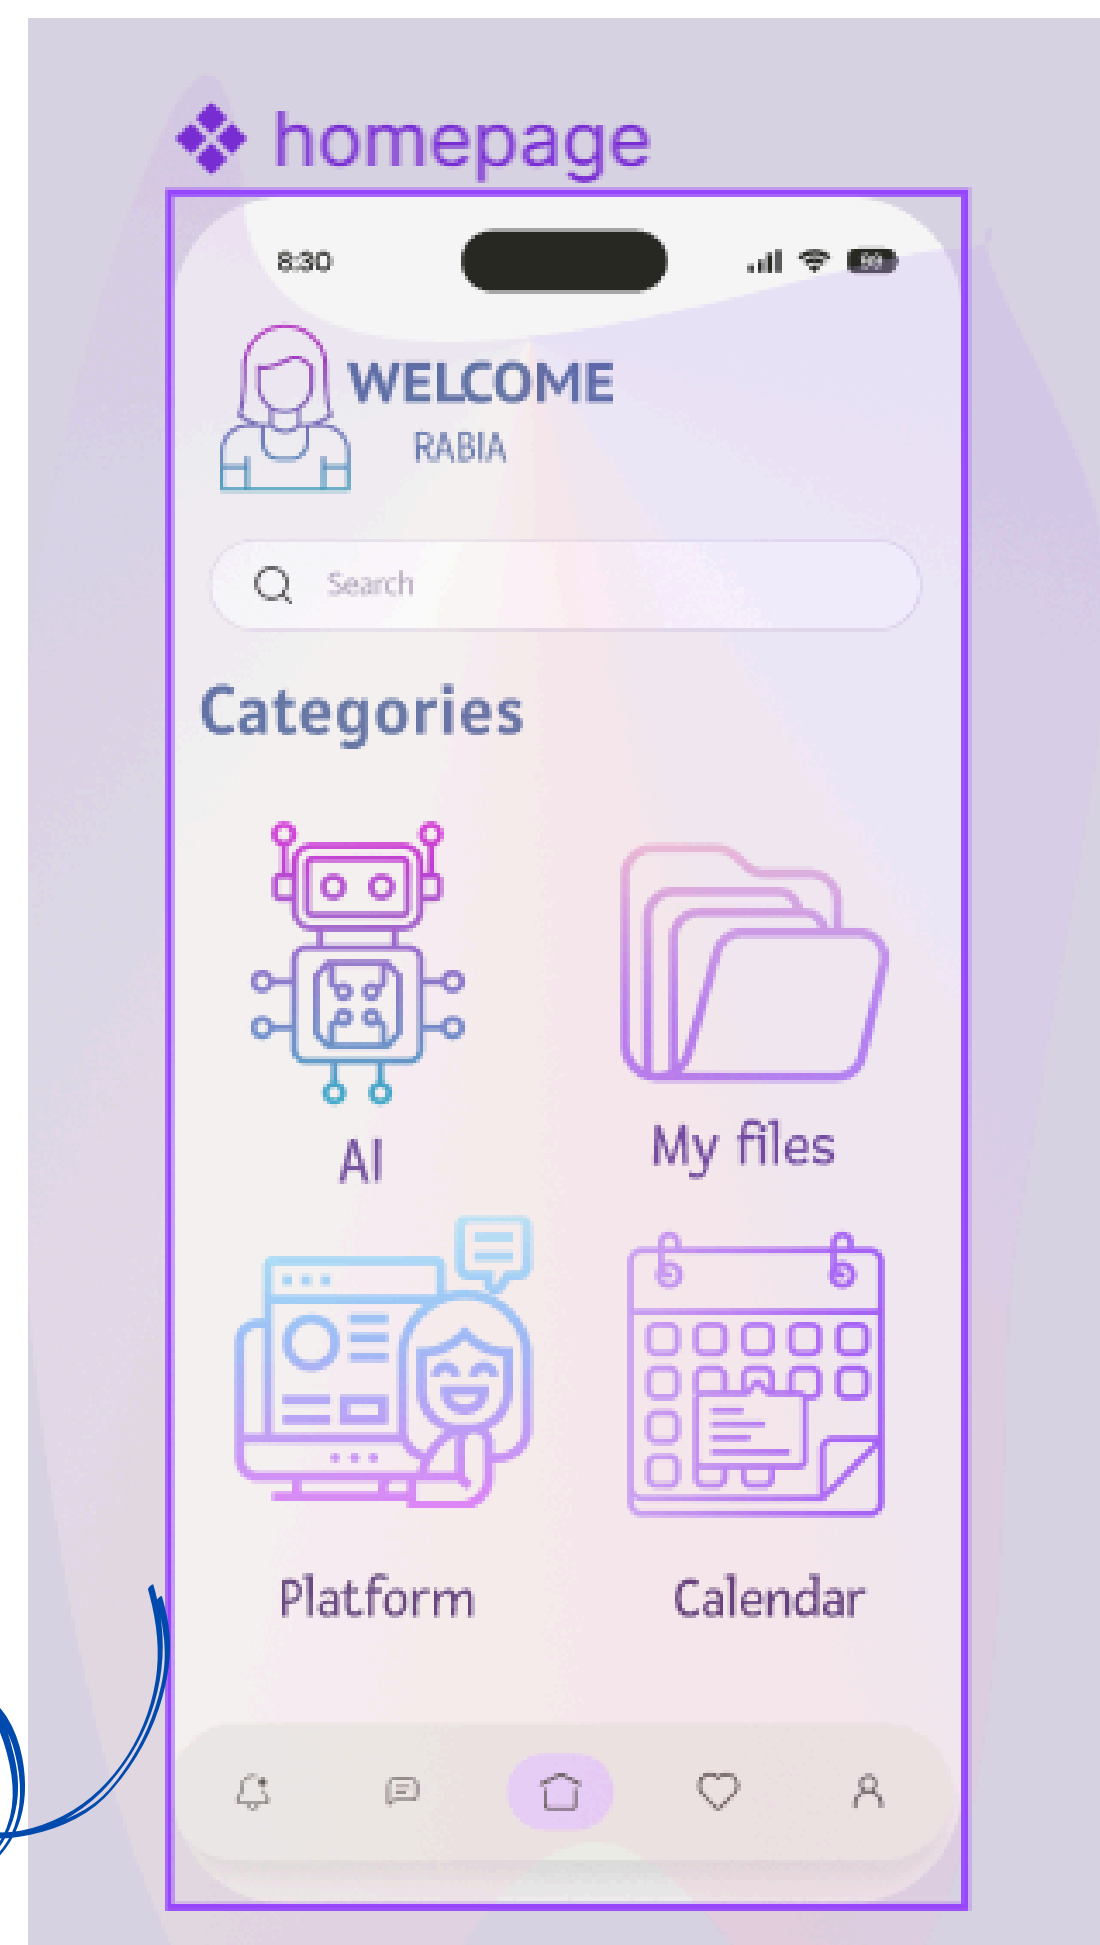

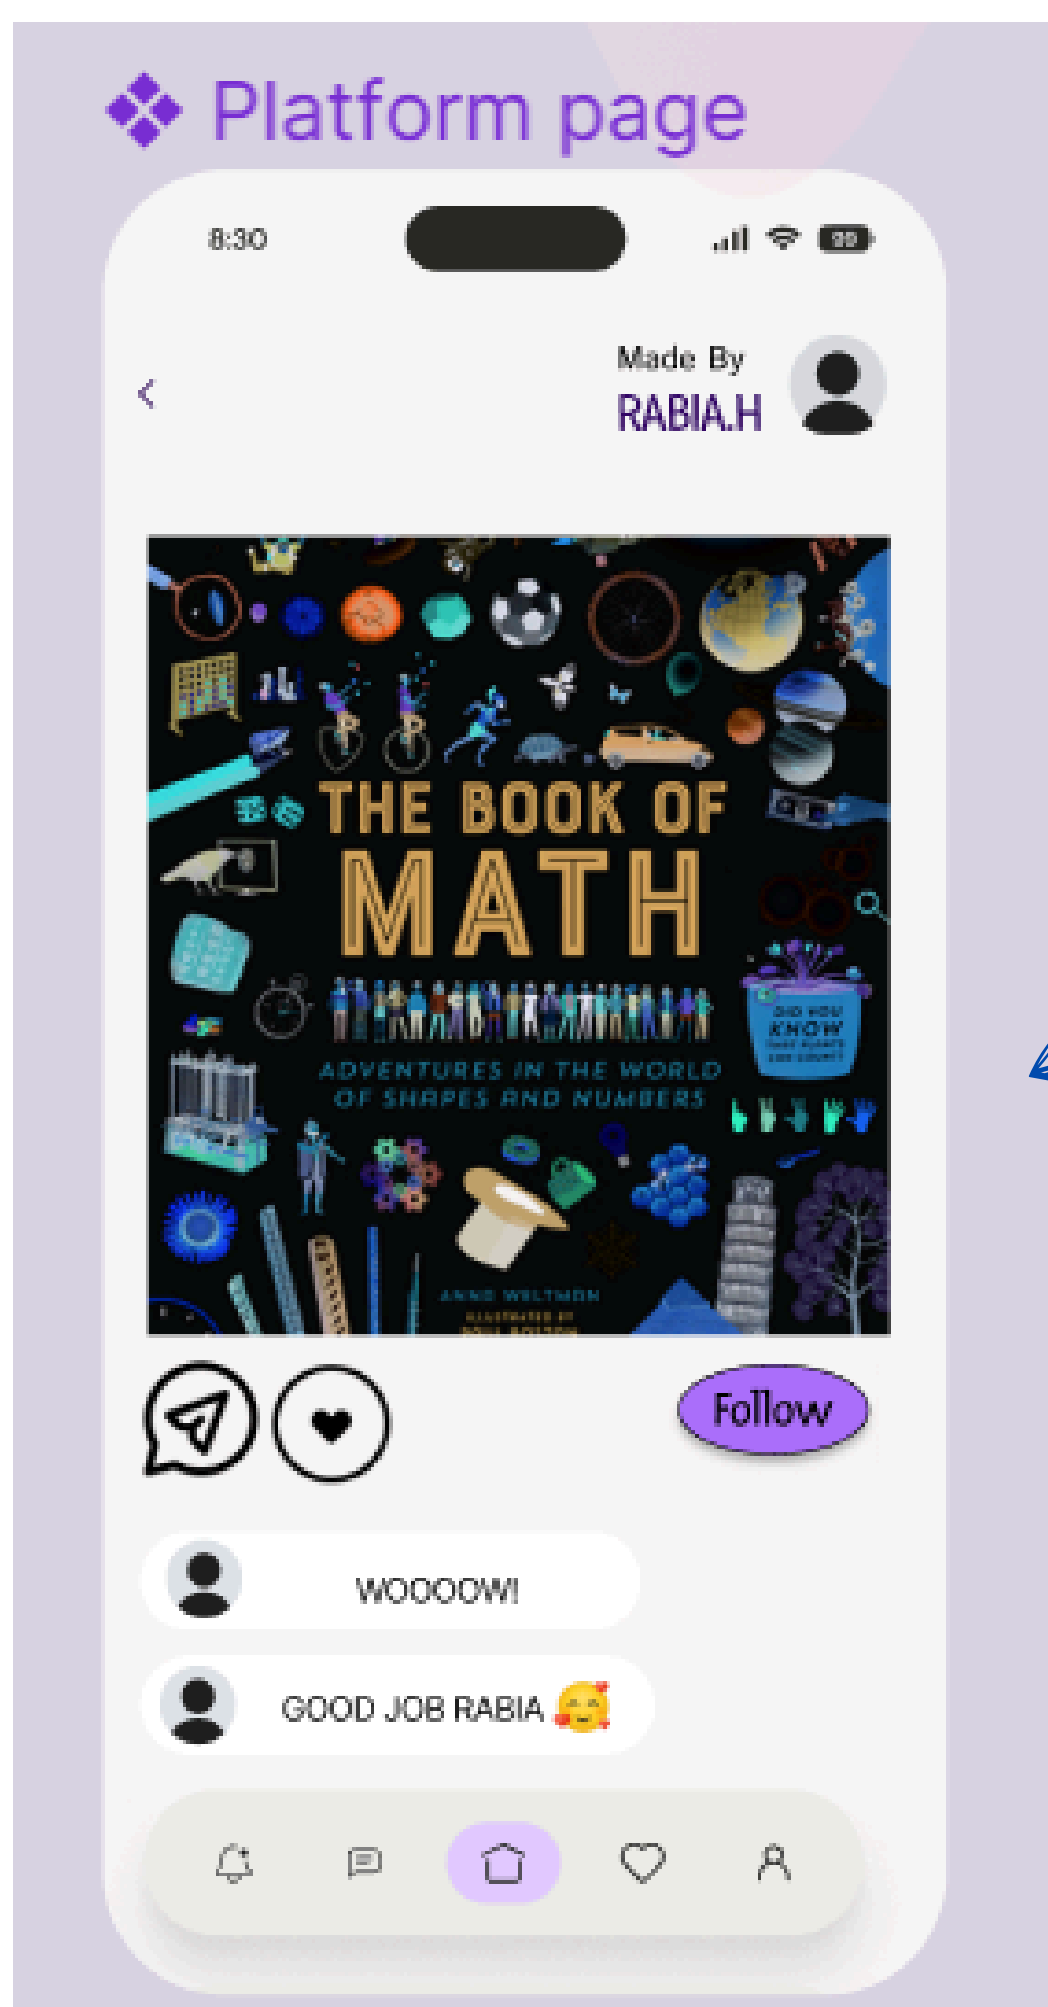

after choosing what you want an ai will generate it for you [for example this interface is for quiz] in the quiz you can set a timer and start the quiz like a real one .

when you finish you can choose where you want to save your file , in local file , in your google drive and link it or save in myfiles in our app

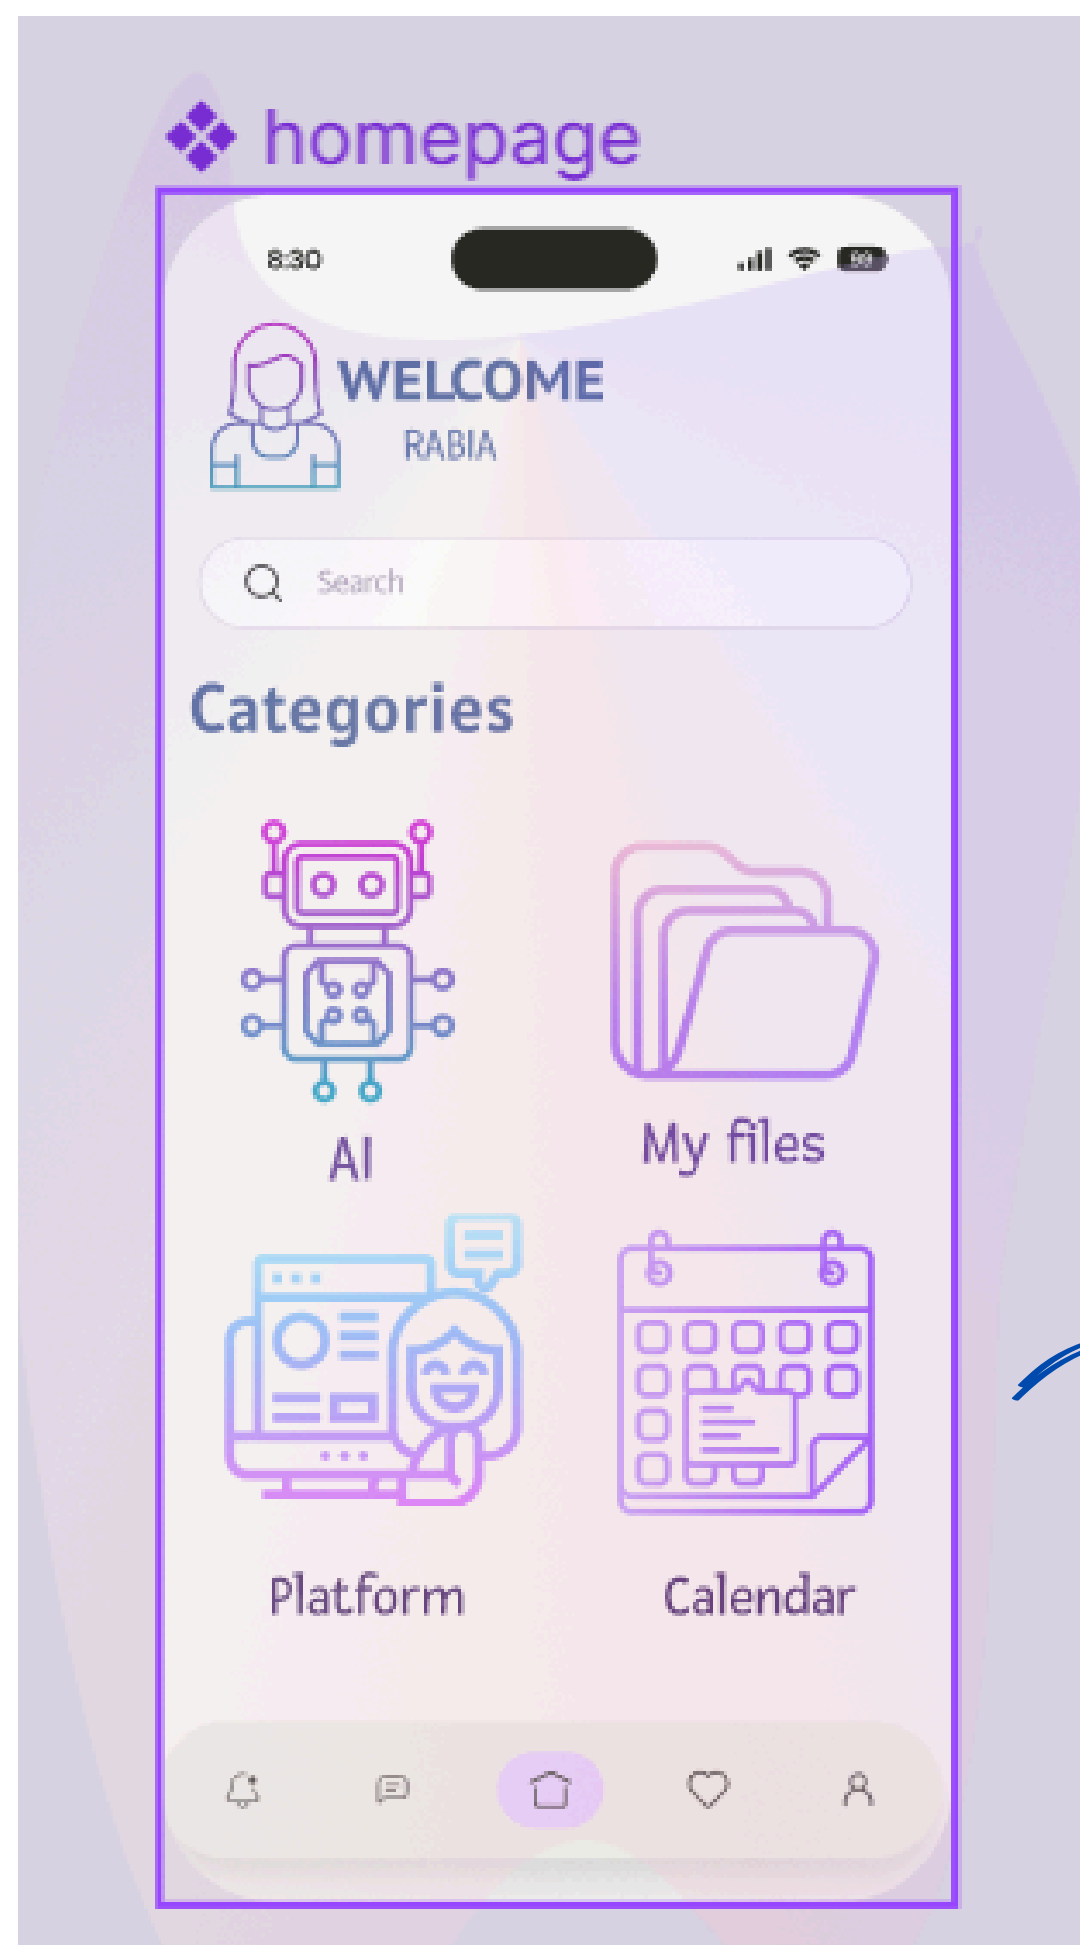

figma designs

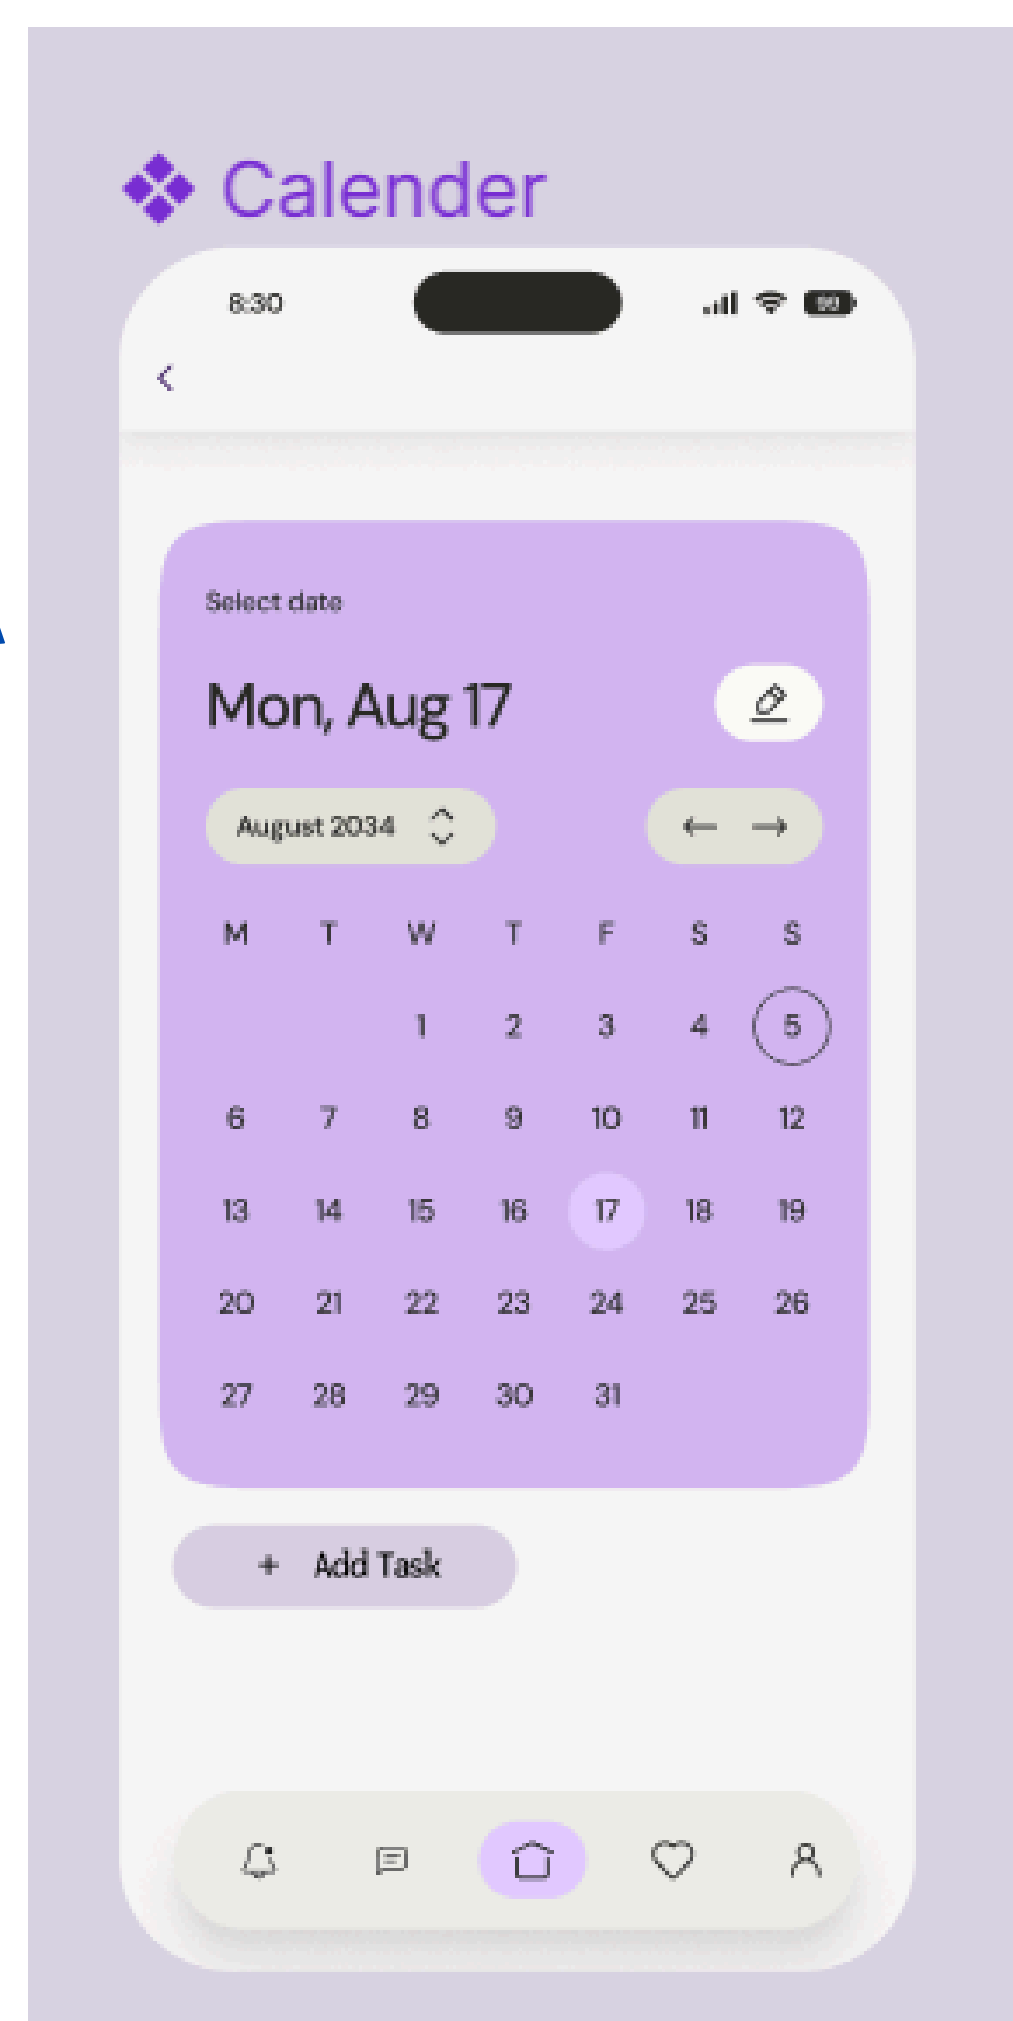

in platform you can share your work and people can comment ,like it and can follow your paltform .

figma designs

in the calendar category , you can add you tasks, assignments or projects dues to track them and monitor them, our app is going to send you notifications if the due is near.

explanation

the ai study helper "gotcha" revolutionizes learning with its intuitive interface resembling social networks. it tailors study plans to individual learning styles and tracks progress. features include personalized calendars, interactive quizzes, and a vast library of study materials. users can collaborate, access materials offline, and receive performance analytics. gotcha caters to students of all levels, ensuring an efficient and effective learning journey.

the design of "gotcha" is user-centric, drawing inspiration from social networks for familiarity and ease of use. clear navigation menus and prominently displayed features simplify organization and encourage engagement. the calendar provides a visual study schedule, while the quizzes screen offers interactive assessments. the design prioritizes simplicity, functionality, and engagement to enhance the learning experience.

**scan this for
prototype view**

or click here

**conclusion and
suggestion:**

conclusion

In conclusion, the AI feature in the GOTCHA app is a powerful tool that revolutionizes the learning experience for students. With its personalized study plans, comprehensive collection of study materials, offline accessibility, progress tracking, high validity in design, and additional platform and calendar features, it provides a holistic solution to enhance academic performance.

The platform feature in the GOTCHA app offers a seamless learning experience by providing a centralized hub for students to access all their study materials, resources, and tools. Whether it's lecture slides, class notes, or additional learning materials, students can conveniently find everything they need in one place. This streamlines their study process, saves time, and ensures they stay organized and focused.

The calendar feature in the app further enhances productivity and time management. Students can schedule their study sessions, set reminders for important deadlines, and create a structured study plan. The calendar integrates seamlessly with the AI feature, ensuring that personalized study plans align with students' schedules and commitments. This feature helps students stay on track, prioritize their tasks, and make the most efficient use of their time.

conclusion

Additionally, the app allows you to upload and manage your own files, making it a versatile tool for accommodating your unique study materials. Whether it's lecture recordings, research papers, or personal study notes, you can easily upload and access them within the app. This customizable aspect ensures that the GOTCHA app adapts to your specific learning needs and allows for a more personalized and tailored study experience.

In summary, the AI feature in the GOTCHA app, along with its platform, calendar, and file management features, provides a comprehensive solution for students to optimize their learning journey. It empowers students to personalize their study plans, access a wide range of study materials, stay organized with calendar integration, and customize their learning experience with their own files.

suggestions

few suggestions for potential future improvements and features for the app:

1. **Intelligent Recommendations:** Enhance the AI feature to provide intelligent recommendations based on user preferences, performance, and learning goals. By analyzing user data and patterns, the app can suggest additional study materials, relevant courses, or even personalized tutoring resources to further support the student's learning journey.
2. **Interactive Study Groups:** Implement a feature that enables students to connect and collaborate with their peers through study groups within the app. This would facilitate discussions, knowledge sharing, and peer-to-peer learning, fostering a sense of community and enhancing the overall learning experience.
3. **Gamification Elements:** Introduce gamification elements to make studying more engaging and motivating. By incorporating features such as achievements, badges, leaderboards, or challenges, the app can create a fun and competitive learning environment that incentivizes students to actively participate and achieve their academic goals.
